EWABO

## ASF A POWDER KEG

This pathogen is amongst the most feared animal diseases that exist. The ASF virus is extremely stable and the illness highly infectious. Once it becomes endemic in the wild pig population, it is practically impossible to eradicate, and even national borders are no longer a barrier.

The danger of it infiltrating the population of domestic swine is therefore growing. The economic damage to be expected in any such case would be considerable and would have catastrophic consequences for facilities affected.

## SYMPTOMS

The clinical symptoms are frequently non-specific and they include

- high fever
- refusal to feed
- breathing problems
- diarrhoea
- blue colouration of the skin
- inability to stand and sudden cases of death

## MEASURES

Adherence to strict hygiene guidelines is crucial.

**Key measures include:**

- Do not feed kitchen scraps or leftovers to pigs
- Strict observance of Pig Husbandry Hygiene Directive
- Maintenance of cleanliness and strictest hygiene measures in the whole operation
- Disinfection mats to be used
- All vehicles to be cleaned and disinfected
- Dead animals to be picked up outside the facility
- Efficient pest and rodent control
- Movement of persons and goods traffic must be limited to the essentials
- The affected areas should be fenced in order to keep out external influences

# PROVEN EFFICACY AGAINST

OUR FLAGSHIP PRODUCTS ALDEKOL DES® 03 AND ALDEKOL DES

## ALDEKOL DES® 03\*

Most powerful foaming disinfectant with formaldehyde

- ✓ Long-term protection for all kind of livestock
- ✓ Full activity against all major diseases even at low concentration
- ✓ The perfect teamplayer to achieve optimized biosecurity

General disinfection 0.5 % / 30 min  
African Swine Fever (ASF) 0.5 % / 60 min

## ALDEKOL DES® FF\*

Multipurpose disinfectant for all kind of farm premises

- ✓ Ensures effective elimination of pathogenic microorganisms
- ✓ Non-tainting and formaldehyde-free

General disinfection 0.5 % / 120 min  
African Swine Fever (ASF) 2.0 % / 45 min

# AFRICAN SWINE FEVER (ASF)

® FF HAVE BEEN SUCCESSFULLY TESTED AGAINST ASF-VIRUS!

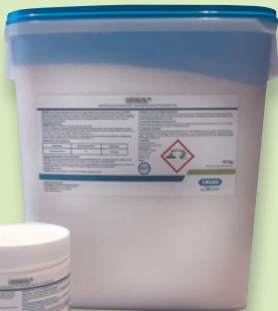

## VALUABLE ADDITIONAL INFORMATION:

Our two pow(d)er disinfectants **BioVX**® (2.5 %) and **OXYKOL**® (0.25 %) also have a proven efficacy against the ASF virus.

### BIO VX

The effective  
pow(d)er solution

### OXYKOL®

Supreme virucidal  
disinfectant

## OUR ADVICE!

### SUCCESSFUL DISINFECTION BEGINS WITH THOROUGH CLEANING

All hygiene management should begin with thorough cleaning as the basis for subsequent disinfection. Our recommendation: **ALKATENS**.

### ALKATENS

Soak cleaning agent with stable foam  
and extra dirt remover

- highly efficient triple concentrate
- highly alkaline with high foam stability
- easily removes pigsty contaminants

# BENEFIT FROM OUR EXPERIENCE!

As a THESEO Deutschland customer, you will enjoy the following benefits and services:

- Expert application advice
- Proven know-how on pathogens and successful control strategies
- Product information and safety data sheets
- Product training
- Operating instructions
- Preparation of individual hygiene plans
- Support with documentary duties
- Access to expert knowledge
- Your personal consultant as your point of contact

In this way, we guarantee the best possible use of our products and increase the cost-effectiveness of your operating processes.

At [de.theseo-biosecurity.com](http://de.theseo-biosecurity.com) you can find further information on our products and hygiene concepts.
